ubuntu@ubuntu:~/getting-started$ ./hwtest.py
usage: hwtest.py [-h] [-C] [-v] [-t TESTDIR] <SUITE_NAME>

Student auto-tester version 3.0.0.

positional arguments:
  <SUITE_NAME>  A test suite name to run ('square'), or 'ALL' for all of
               them.

optional arguments:
  -h, --help            show this help message and exit
  -C, --clean            Remove generated actual and diff files for chosen suite(s).
  -v, --verbose          Verbose mode. Shows the commands executed.
  -t TESTDIR            Choose the directory with the tests and test content.
                       Default: tests
